MindSense Platform User Guide

Official Operational Manual, Rules, Regulations & Non-Medical Disclosures | Version 1.3

NON-MEDICAL RESEARCH & WELLNESS DISCLAIMER

MindSense is an academic affective computing research and wellness monitoring platform. AI-generated emotional predictions are mathematical softmax estimations computed from text, speech acoustics, and facial expressions using an Intermediate Cross-Attention Transformer. MINDSENSE IS NOT A MEDICAL DIAGNOSTIC SYSTEM AND DOES NOT PROVIDE PSYCHIATRIC DIAGNOSIS OR CLINICAL ASSESSMENT.

SECTION 1 — 8-STEP VISUAL OPERATIONAL WALKTHROUGH

Step	Action	Description
01	Open MindSense	Access the public platform via your standard desktop or mobile web browser.
02	Sign In (Optional)	Create or sign into a local research account to save assessment history.
03	Select Modality	Choose input stream mode: Text, Audio, Image, or Multimodal Fusion.
04	Provide Input	Enter statement, record microphone audio (.wav), or capture facial snap.
05	Start Analysis	Execute the intermediate cross-attention inference pipeline.
06	Review Results	Inspect dominant emotion, softmax confidence score, and modality breakdowns.
07	Explore Insights	Track longitudinal emotion trends, daily journal notes, and check-ins.
08	Explore Research	Examine model architecture, CREMA-D/RAVDESS corpora, and ablation studies.

SECTION 2 — RULES & REGULATIONS FOR ACCEPTABLE USE

1. Responsible AI & Consent: Users must obtain appropriate authorization prior to uploading third-party biometric or facial data. Uploading unauthorized media of another individual is strictly prohibited.
2. Prohibited Use: MindSense must NOT be used to make high-impact decisions (employment, academic evaluations, legal proceedings, insurance, or psychiatric triage).
3. Research Integrity: Empirical estimates generated by MindSense may be referenced for affective computing research provided the AI estimate methodology is disclosed.
4. Secure Sharing: Shared links generated via MindSense must contain only public prediction summaries. Do not encode passwords, raw recordings, or authentication tokens into URLs.
5. Account & Data Privacy: Data is processed securely under minimal retention rules. Users retain full rights to wipe assessment history or export records.

SECTION 3 — TROUBLESHOOTING & SYSTEM SPECIFICATIONS

Microphone / Camera Permission Denied: Ensure your web browser has granted microphone and webcam permissions in browser settings.
Audio Preprocessing Errors: Audio uploads must be valid uncompressed WAV files or recorded via the built-in 16kHz microphone tool.
No Face Detected: Image inputs require a clear, well-lit, frontal facial crop. Extreme occlusion or low lighting may fail face detection.
